

FITTED AS STANDARD BY BACK TO BASEMENT

Unique 8 Channel **Smart Wireless Alarm** Panel with a Built in **Telephone Auto-Dialler** supplied with a **Wireless Water Float Sensor**, can be used to:

- Monitor for Rising Water
- Monitor for Falling Water

The **Alarm Control Panel** can be used in 3 ways to monitor for the Rising or Falling Water:

1. One off Chime & continual Flashing LED (until reset) on the Control Panel
2. Siren (adjustable duration from 1 – 6 minutes)
3. Siren & Telephone Calls to 8 Key-holders

The Control Panel includes specifications normally associated with more complex & expensive Alarm Systems,

- Built in 120 Decibel Siren (adjustable duration from 1 – 6 minutes).
- Battery Back Up.
- Built in User Keypad (used for simple programming and daily operation).
- Stylish Back Light (very useful coming into a dark room, glows red when triggered).
- Adjustable Entry Delay (10 – 60 seconds).
- Adjustable Exit Delay (10 – 60 seconds).
- Two ways Communication when the key-holder is contacted.
- 8 Wireless Channels (no limit to the number of alarm detectors that can be used).
- Can be operated by three methods (Built in Keypad, Remote Controls & Battery Powered Wireless Keypad).
- Can be used with up to 99 Remote Controls or Wireless Keypads
- Built in Chime Alert (on any of the 8 wireless channels, easily by turned ON & OFF to suit different times of the day).
- Pre-record your own personal 20 second message.
- It can contact up to 8 x key-holders (between 1 & 9 times) following activation.
- 6 Modes of Operation (full arm, home arm, chime, panic, duress, disarm).
- ADSL Line Splitter BT Socket to BT and RJ11.
- Built in Low Battery Warning.

PERFECT FOR WHEN YOU ARE AWAY
